Scope of Work

Ohio Indiana Trail Bridge Repairs

The City of Piqua is requesting proposals from contractors for the replacement of decking and rail repairs to the Ohio Indiana Trail Bridge located in the 100 block of Main Street, Piqua, OH 45356 and extending over the Great Miami River.

The repairs are to include the replacement 3"x6" ACQ S4S SYP Treated decking material with proper galvanized screws. All other construction members are to be treated no less than 2x4 for bracing material, and to match existing material size for rail replacement. All areas of replacement are indicated with white construction paint for proper location of repair zones that match the estimated quantities. The bridge can be accessed for construction on the east or the west end of the project but must remain closed until the project is completed.

No material is to be dropped into the river during construction. If there is a material that accidentally falls into the water, all efforts should be given to remove this material from the river.

Because this construction material is irregular in size, please provide the estimated time to complete the project.
