Transportation Committee Mission Statement:

- Explore and determine the concerns of affected residents and business in the City with respect to public transportation infrastructure, including but not limited to streets, highways, sidewalks, bike trails, airports, and railroads.
- Make committee findings; propose plans and specific recommendations to the City Manager, Commission, and other public parties of interest regarding public transportation facilities.
- Assist in informing the public of transportation issues within the City.

Traffic Daily Log
24May 2012

Went to Park/College & Nicklin to check the intersections operations as per an observation from Officer Marty Groves. He had stated that he didn't know if the intersection was working correctly due to the traffic lights seemed to be continually cycling.

I checked the controller and found that there was a constant call coming from the pedestrian buttons on College. After checking the system I found that a Ped. button that I had replaced a few months ago was bad. I replaced the bad button and the intersection is now working properly.

A question was also asked about the timing of this intersection. This intersection is set to Recall to Park Ave. and rest in Green and service traffic on College and Nicklin as needed.

Mike
