

Maintenance Recommendations:

- > **I** – Monitor the underside of the bridge and the curbs on the bridge for any loose SIP forms or pieces of concrete that may fall onto traffic. Remove loose pieces of concrete to prevent this from occurring. **Falling debris can be a safety hazard.**
- > **S** – Repair abutment seats under truss bearings. (Coordinate with LJB.)
- > **S** – Program the truss for structural steel painting within the next 5-10 years.
- > **M** – Clear any vegetation that has encroached within five feet of the truss or fence.
