

## Piqua, OH

Dashboard Summary of Findings

2015

2955 Valmont Road Suite 300 Boulder, Colorado 80301 n-r-c.com • 303-444-7863

777 North Capitol Street NE Suite 500 Washington, DC 20002 icma.org • 800-745-8780

## **Summary**

The National Citizen Survey™ (The NCS™) is a collaborative effort between National Research Center, Inc. (NRC) and the International City/County Management Association (ICMA). The survey and its administration are standardized to assure high quality research methods and directly comparable results across The NCS communities. The NCS captures residents' opinions within the three pillars of a community (Community Characteristics, Governance and Participation) across eight central facets of community (Safety, Mobility, Natural Environment, Built Environment, Economy, Recreation and Wellness, Education and Enrichment and Community Engagement). This report summarizes Piqua's performance in the eight facets of community livability with the "General" rating as a summary of results from the overarching questions not shown within any of the eight facets. The "Overall" represents the community pillar in its entirety (the eight facets and general).

By summarizing resident ratings across the eight facets and three pillars of a livable community, a picture of Piqua's community livability emerges. Below, the color of each community facet summarizes how residents rated each of the pillars that support it – Community Characteristics, Governance and Participation. When most ratings were higher than the benchmark, the color is the darkest shade; when most ratings were lower than the benchmark, the color is the lightest shade. A mix of ratings (higher and lower than the benchmark) results in a color between the extremes.

Broadly, ratings about the characteristics of the Piqua community, its governance and citizen engagement were similar to or lower than other places. Areas with ratings that were on par with other communities were the pillar of Participation, along with the facets of Safety, Education and Enrichment, community characteristics relating to Mobility and services related to Natural Environment. This information can be helpful in identifying the areas that merit more attention.
